

+ Dear Dr. Ceydeli, +

Jim & I wanted to say Thank you for your help and concern through our recent trials.

It has been obvious to us through Jim's treatment process that you took the time to go above and beyond all call of duty.

It goes without saying how much I appreciate what you have done for me medically.

What we would like to say however, is how rare and compassionate you are and while words or gifts are inadequate to express our appreciation we thought you would enjoy this small token of friendship.

Sincerely,
[Redacted]
